## REQUEST FOR PROPOSALS – PREQUALIFICATION POOL

### Purpose of This Request For Proposal

The Town of Drumheller, (henceforth “the Client”) has retained Energy Associates Inc. as energy management consultant to assist in the evaluation of RFP responses and the supplier selection process. The purpose of this Request for Proposal (RFP) is for the purchase of firm, non-curtable supply of natural gas to be delivered to facilities located in Apex Utilities service territory. As a secondary goal, the Client wishes to obtain firm and competitively priced natural gas supply from a responder who is in good financial standing. Finally, the Client will utilize the responses from this RFP to establish a prequalified pool of Bidders for future natural gas transactions. Only those Bidders designated as being prequalified will be invited to bid on the district’s natural gas requirements during the period of April 1, 2022 – December 31, 2024 with the option to extend the prequalification pool term by an additional 12 months (to December 31, 2025). During that time, the district has the right to secure fixed price natural gas contracts for terms up to December 31, 2030 from the prequalified pool of Bidders. Bidders that do not meet the prequalification requirements will not be permitted to bid on the district’s natural gas requirements during the period of April 1, 2022 – December 31, 2024/ December 31, 2025. The Client may dissolve the prequalification pool at any time with thirty days’ written notice to pool participants. For more details on the prequalification requirements, please see 2.5 – Evaluation of Criteria.

The current total annual normalized natural gas energy usage by the Client is approximately 34,400 for 25 sites. **Note: Sites and volumes are subject to change prior to the firm bid round. All participating Bidders will receive an updated final list for firm bid round purposes.**

From Proposals received, the Client will select Bidders which shall be the standard for future orders under the terms of each Contract awarded by virtue of this RFP throughout the Term of such Contracts. Provide a response on a point-by-point format that follows this RFP outline.

In addition, the response must address each of the following in this Section 4.0:

#### **4.1 Pricing**

Completely describe all pricing structures, which must be net, GST excluded, and quoted in Canadian dollars. Pricing for all items related to the supply of natural gas commodity must be disclosed in the response, and if contracts are awarded, no sums will be paid by the Client for any part of the contract except those disclosed in the response.

Completely describe your natural gas commodity pricing on a per GJ unit basis in the proposal (GST excluded) for natural gas delivered into the Apex Utilities system.

Indicative prices included in the response must be generated on market conditions, using the appropriate date and time (trading day), as well as the specified volumes provided in the schedule. The Client requests that indicative prices are to be based on market conditions on March 17, 2022 at 10:30 am Alberta time. The Client reserves the right to request updated indicative pricing if it deems necessary as a result of pricing volatility and related events in the wholesale forward market.

Bidders are requested to explain the pricing algorithm that would be utilized, should either i) unused contracted natural gas is resold into the AECO Index market, or ii) excess natural gas be purchased in the AECO Index market. Bidders should carefully identify all relevant reporting functions that are included with online energy management reporting accounts. Examples of reporting functions include, but are not limited to:

- Usage reports: Data available in daily, monthly and/or annual quantities, on a per-site or portfolio basis.
- Cost reports: Reports would clearly identify commodity and delivery costs, with further specific line by line detail available, on a per-site or portfolio basis.
- Delivery Cost reports: Access detailed breakdown of all invoiced regulated Delivery costs from the Local Distribution Company.
- Invoice reports: Ability to view and download electronic copies of invoices, for both current and all historical invoices, in a variety of file formats.

Bidders are to explicitly highlight special terms and conditions of supply related to their energy products. Where applicable, Bidders should identify unique features of their contract that could provide a advantage to the Client.

List separately any contractual terms, which you would like the Client to consider, but which would not be a condition to the acceptance by the Client of your response and which would only be part of the contract with the Client with the specific further agreement of the Client. The Client, at its sole discretion, may accept, reject or choose to negotiate which terms it will include in any contract with the Bidder.

#### **4.4 References**
